

Sheet1

Group	Idea	Con	Place
Kiala	Posts in water to cover certain amounts of the water over time	Still allows some light to pass through	4
Tyler	Bacteria to eat chlorine	Possible toxic effects, does not make water clean enough to drink	7
Nathan	Giant tank to shield water	Expensive, difficult construction	3
Forrest	Plant lilypads to cover water	Requires post-purification, takes time to implement	2
Nick	Distillation and bromate filter at resovour	Huge energy costs	6
Kevin S	Use balls to absorb sunlight	Gaps, easily stolen, could be expensive	1
Kevin F	Use a solar boiler to purify the water	Slow, large structure requires space and expensive	5
