

# Clay Arch Bridge

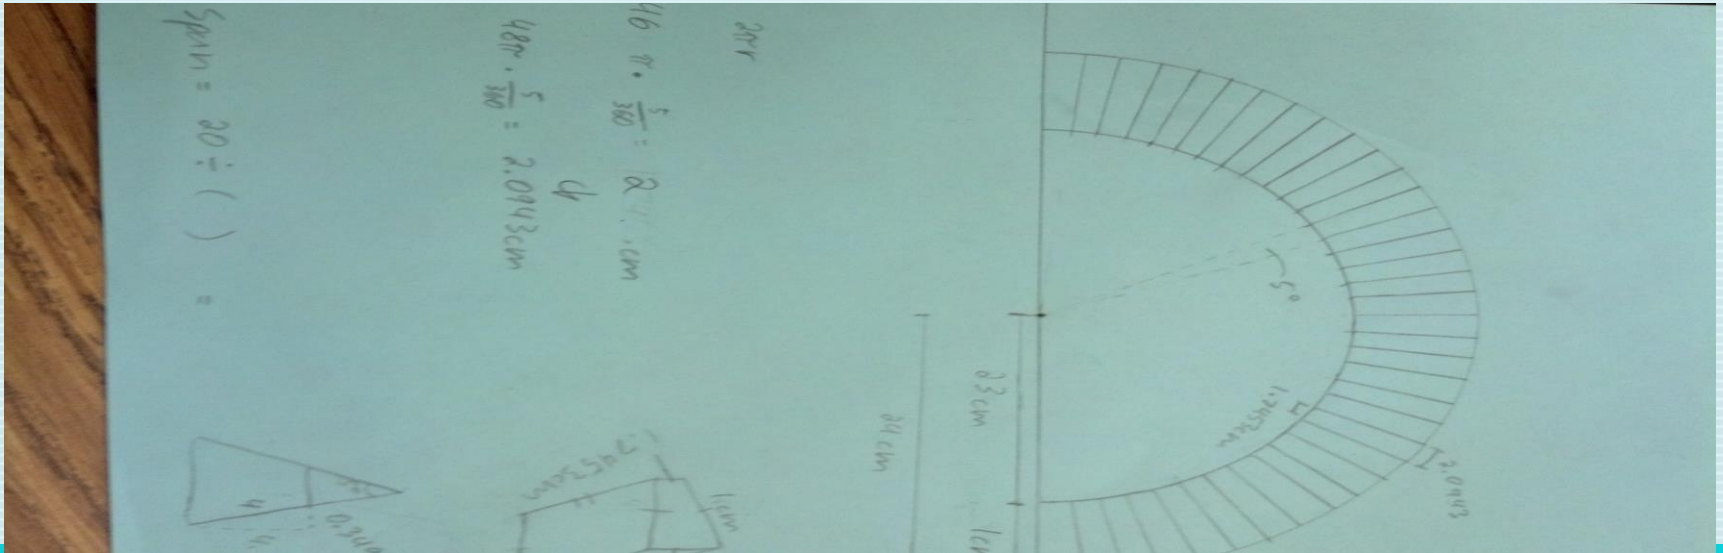

**KIRK LUTHER  
ADRIAN SAMKIAN  
KEVIN FAEUSTLE**

# Design

- We made our bridge out of clay
- Our predicted score was 2
- We tried to make sure clay was not considered as a adhesive

# Final Design

- Our Final Score was 2.2

# Lessons Learned

Clay is really hard to make into exact measurements and we should have tools to actually be able to work with the materials.

Next time I would change how we made the bridges and instead of laying it out I would have put it on wax paper and waited for it to dry a little before we cut it and have the wire stuck into one place so all the cuts would be exact.
